About Course

The CompTIA Network+ is an information technology (IT) certification exam that confirms an individual possesses the skills in networking required to develop a career in IT infrastructure. CompTIA (The Computing Technology Industry Association) is the provider of vendor-neutral IT certification.

N+

CURRICULUM

① Topologies And Infrastructure

Topologies and the OSI Model

Ethernet

Hubs, Bridges and Switches

Infrastructure and Design

② Addressing And Routing

PC and Mobile Operating Systems

PC Operating System Tools and Utilities Internet Protocol

IPv4 Addressing

DHCP and APIPA

IPv6 Addressing

Routing

③ Troubleshooting And Management

Transport Protocols

Name Resolution

Troubleshooting

Application and Services

Management and Monitoring

Cloud and Virtualization

4 Installation

Network Sites

Installing Cable

Installing Wireless Networks

WAN Technologies

Remote Access

5 Security

Vulnerabilities and Threats

Security Appliances

Authentication

Incident Response

Change and Configuration Management
