

CAKE PHP

Cake PHP

About Course

CakePHP is a free, open-source, rapid development framework for PHP. It's a foundational structure for programmers to create web applications. Our primary goal is to enable you to work in a structured and rapid manner—without loss of flexibility. CakePHP takes the monotony out of web development.

CAKE PHP

CURRICULUM

1

Introduction

Installating CakePHP

CakePHP Request

Download Curriculum

2

CakePHP Conventions

Controller Conventions

Filename and Classname Conventions

Model and Database Conventions]

View Conventions

3

CakePHP Overview

What is CakePHP

Understanding Model-View-Controller (MVC)

4

Controllers

What is a Controller?

The App Controllers

Request Parameters

Controller Actions
Request Callback
Controller Methods
Controller Attributes
Request & Response Objects
CakeRequest
CakeResponse
Scaffolding
Pages Controller
Components

5 Views

Themes
View Templates
Using View Blocks
Layouts
Elements
Creating your own view classes
View API
Helper
JSON and XML

6 Model

Understanding Model Association

Read data
Saving data
Deleting data
Data Validation
Callback Methods
Behaviors
Model Attributes
Model Methods
Transactions

7 Global Constants And Functions

Use Cases of Autoscaling
Important Components of AutoScaling
Configuration of Autoscaling
Launch Configuration and LB Group
Pricing

8 Helpers

Form Helper
HTML Helper
JS Helper
Pagination Helper
Cache Helper

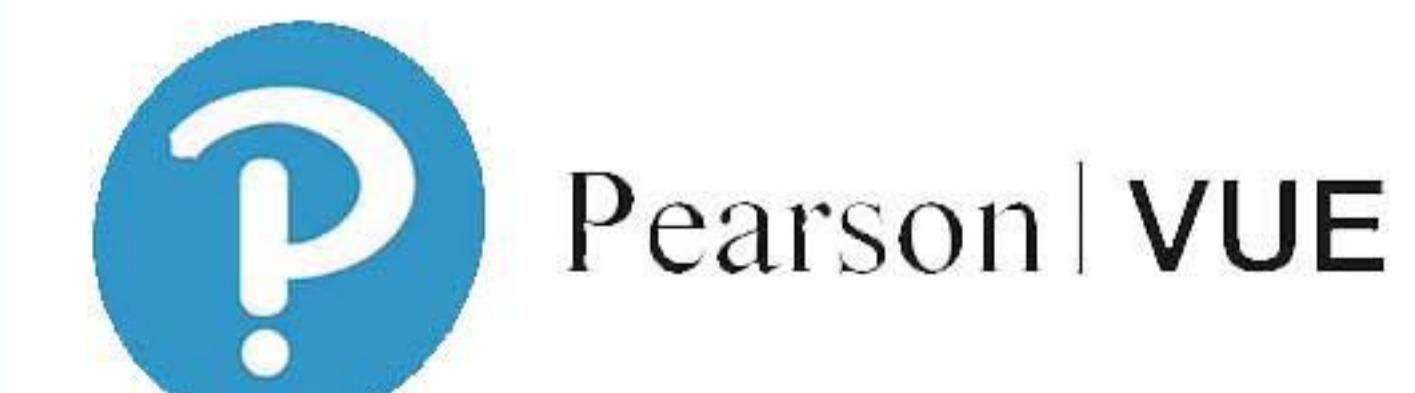

9 Components

ACL
Authentication
Email Component
Pagination
Session
Security
Request Handler
Cookie

10

Plugins

What is a Plugin
Installing Plugins
Configuration of Plugin
Bootstrapping
Using a Plugin
Creating a Plugin
Plugin Controllers
Plugin Methods
Plugin Views
Component, View, Model
